The Aidan – the first choice multi fuel boiler for central heating systems

Ireland's biggest selling boiler stove

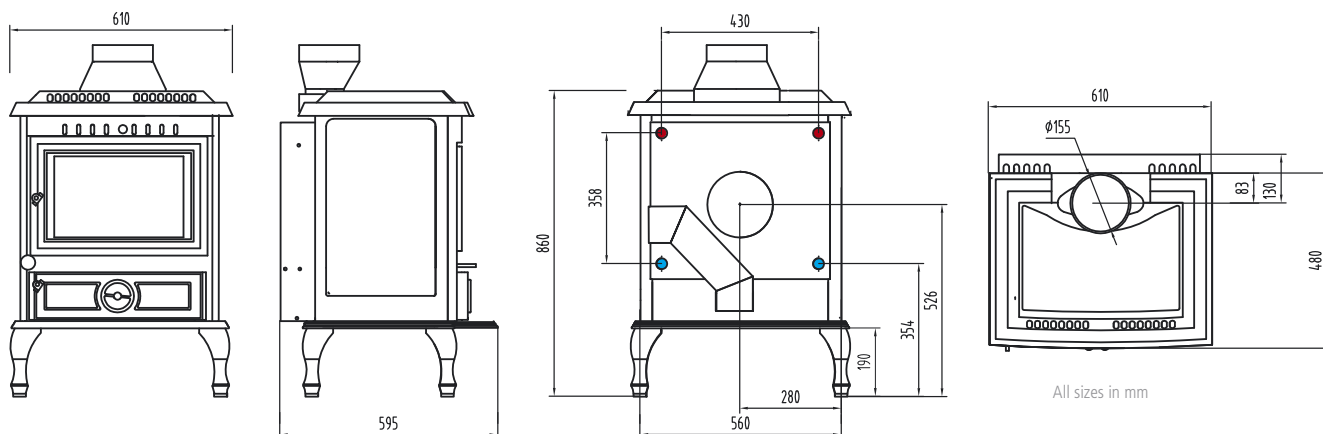

Thousands upon thousands of homes throughout Ireland are heated with the Olymberyl® Aidan® multi fuel boiler stove where it has easily set the benchmark for exceptional build quality, outstanding performance and all-round value for money. It's the family friendly heating work horse that just keeps going and going and will easily power up to 12 radiators and provide you with all the domestic hot water you could need. Traditional good looks, fine quality cast iron construction, thermostatic control and an air wash system are just some of its charms. Easy to remove baffle plate and simple flue way cleaning, plus comprehensive nationwide spares service means the Aidan's many attractions are not just skin deep.

The Aidan's key features and benefits

- CE tested in the Europe to strict BS EN 13240 standards for total confidence
- Flexible and efficient wood or multi fuel operation for added choice
- External riddler and, for keeping the glass clean, an Air Wash System
- Premium quality construction – over 200kg (31.5 stone!) of the finest quality, best-in-class casting for longer lasting life and superior radiated heat
- Four 1" BSP side water ports for flexibility and ease of installation
- Simple thermostatic comfort control for ideal water temperature
- Top and (unusually for a boiler stove) rear fitted 150 mm (6") flue option
- Choice of traditional matt black finish or high gloss Black or Brown enamel
- Five year bodywork and boiler guarantee for complete peace of mind

Black or Brown enamel option

All sizes in mm
